

## PiBox - Action Item #138

### Missing /etc/opkg.conf

25 Nov 2012 18:59 - Hammel

<b>Status:</b>	Closed	<b>Start date:</b>	25 Nov 2012
<b>Priority:</b>	Immediate	<b>Due date:</b>	
<b>Assignee:</b>	Hammel	<b>% Done:</b>	100%
<b>Category:</b>	04 - Root File System	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.5.0 - Beta 1		
<b>Severity:</b>	Critical		
<b>Description</b>			
<p>The opkg-cl program has default settings that can be extended and/or overridden by entries in /etc/opkg.conf. However, this file does not exist by default. So it needs to be created.</p> <p>The default content should include destination definitions, such as:</p> <pre>  dest opt /opt</pre> <p>Since most PiBox packages should be installed under /opt, and this should be the default.</p> <p>Information on how to use the conf file can be found in this <a href="#">opkg tutorial from OpenWRT</a>.</p>			

### History

#### #1 - 25 Nov 2012 21:18 - Hammel

- Status changed from In Progress to Closed

- % Done changed from 0 to 100

Added src/buildroot/skeleton/etc/opkg.conf to pibox source tree.
