

## PiBox - Bug #139

### Idconfig missing from rootfs

25 Nov 2012 19:10 - Hammel

<b>Status:</b>	Closed	<b>Start date:</b>	25 Nov 2012
<b>Priority:</b>	Immediate	<b>Due date:</b>	
<b>Assignee:</b>	Hammel	<b>% Done:</b>	100%
<b>Category:</b>	04 - Root File System	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.5.0 - Beta 1		
<b>Severity:</b>	Critical		
<b>Description</b>			
<p>Idconfig is missing from the rootfs. It is in the toolchain under arm-unknown-linux-gnueabi/sysroot/sbin.</p> <p>None of the sysroot stuff from the toolchain are being copied to the rootfs. Buildroot doesn't have an option to handle it automatically. So it will have to be done in a preconfig step, probably into the customize package.</p>			

### History

#### #1 - 29 Nov 2012 18:55 - Hammel

- % Done changed from 0 to 50

Added sysroot to target build tree. These files have not been tested yet, however.

#### #2 - 06 Dec 2012 10:26 - Hammel

- Status changed from In Progress to Closed

- % Done changed from 50 to 100

Tested it last evening. First attempt acted like it didn't get run properly. Subsequent runs seemed okay.

For now, I can close this issue.
