

PiBox - Feature #140

Need init script to run ldconfig on boot

29 Nov 2012 19:04 - Hammel

Status:	Closed	Start date:	29 Nov 2012

Category:	04 - Root File System	Estimated time:	0.00 hour
Target version:	0.5.0 - Beta 1		
Severity:	Critical		
Description			
<p>ldconfig is not run in the Buildroot build because the host ldconfig is used (the cross toolchain does not have the proper layout nor a host-ldconfig for Buildroot to use instead) but doesn't work right. So ldconfig needs to run at boot time. It definitely should be run on first boot. It's not clear if it should be made to run on every boot, but probably not. Any installed apps can run it manually on installation.</p>			

History

#1 - 29 Nov 2012 20:22 - Hammel

- % Done changed from 0 to 50

Added /sbin/ldconfig to firstboot. Not tested yet.

#2 - 06 Dec 2012 10:27 - Hammel

- Status changed from In Progress to Closed

- % Done changed from 50 to 100

S11firstboot runs ldconfig on the first boot. It shouldn't need to be run again after that unless an opkg needs it, but then the opkg install should handle that.
