

PiBox - Packaging #145

Create an O.4 release and push to offline storage

31 Jan 2013 09:21 - Hammel

Status:	Closed	Start date:	31 Jan 2013
Priority:	Immediate	Due date:	
Assignee:	Hammel	% Done:	100%
Category:	05 - Releases	Estimated time:	0.00 hour
Target version:	0.5.0 - Beta 1		
Severity:	High		
Description			
Create a tarball of the 0.4 release of PiBox and push it to a public offline storage site.			
A complete distribution, including toolchain RPM, is about 1.7GB. I may not need the "staging.tar" tarball anymore, however. I think XBMCBox now requires pointing at the staging tree as built in PiBox. so that will drop 1.1G from that total size.			

History

#1 - 31 Jan 2013 09:45 - Hammel

- Severity changed from Critical to High

#2 - 02 Feb 2013 17:08 - Hammel

- Category set to 05 - Releases

- % Done changed from 0 to 100

Generated 0.4.0 tarball and pushed to Ubuntu One. Release has been announced on the [News page of the issue tracker](#) and links added to the [Release Images](#) page of the wiki.

#3 - 02 Feb 2013 17:11 - Hammel

- Status changed from New to Resolved

#4 - 02 Feb 2013 17:11 - Hammel

- Status changed from Resolved to Closed
