

PiBox - Bug #170

Bump connman to 1.11

24 Feb 2013 11:40 - Hammel

Status:	Closed	Start date:	24 Feb 2013
Priority:	Immediate	Due date:	
Assignee:	Hammel	% Done:	100%
Category:	04 - Root File System	Estimated time:	0.00 hour
Target version:	0.5.0 - Beta 1		
Severity:	03 - Medium		
Description			
Connman in 2012.05 is at 0.78. Buildroot has since switched to using public releases (instead of GIT) and the current rev of connman is 1.11.			

History

#1 - 24 Feb 2013 13:05 - Hammel

- % Done changed from 0 to 50

Added patches to rev connman to 1.11 in my sandbox. The rebuild of the rootfs and connman goes fine. I need to do a complete rootfs build to verify before checking in the new patches.

#2 - 25 Feb 2013 09:08 - Hammel

- Status changed from In Progress to Closed

- % Done changed from 50 to 100

Tested patches with full build. They do not break the build and generate the required build artifacts.
