

PiBox - Bug #241

disable openssh in rootfs

07 Nov 2013 09:45 - Hammel

Status:	Closed	Start date:	07 Nov 2013
Priority:	Immediate	Due date:	
Assignee:	Hammel	% Done:	100%
Category:	04 - Root File System	Estimated time:	0.00 hour
Target version:	0.9.0		
Severity:	01 - Critical		
Description			
<p>openssh is enabled in the rootfs build, as is dropbear. I can't think why we might need both other than openssh having scp, sftp, etc.</p> <p>dropbear supports scp (but not sftp). It provides all the features we need except perhaps privilege separation. For the time being, this seems sufficient and we can remove openssh.</p> <p>Note: Removing openssh is part of the process of speeding up boot times and integrating a splash screen.</p>			

Associated revisions

Revision 23df6532 - 18 Mar 2014 19:15 - Hammel

RM #241: removed openssh package from rootfs configuration.

History

#1 - 14 Mar 2014 14:51 - Hammel

- Target version changed from 1.0 - Atreides to 0.9.0
- % Done changed from 0 to 50

I'm pretty sure this is already completed. However, I want to review it once more for 0.9.0 to be certain before closing the issue.

#2 - 17 Mar 2014 19:00 - Hammel

- Priority changed from Urgent to Immediate
- Severity changed from 03 - Medium to 01 - Critical

#3 - 17 Mar 2014 19:56 - Hammel

- Status changed from New to In Progress

openssh was not disabled in the Buildroot configuration. I've disabled it and will rebuild the complete rootfs to test that it works as expected.

#4 - 18 Mar 2014 19:17 - Hammel

- Status changed from In Progress to Closed
- % Done changed from 50 to 100

Verified package is removed.

Closing issue.
