

PiBox - Bug #283

XBMC packages overriding existing targets

07 Mar 2014 08:41 - Hammel

Status:	Closed	Start date:	07 Mar 2014
Priority:	Normal	Due date:	
Assignee:	Hammel	% Done:	100%
Category:	04 - Root File System	Estimated time:	0.00 hour
Target version:	2.0 - Harkonnen		
Severity:	03 - Medium		
Description			
<p>The XBMC package inserted by PiBox into Buildroot includes many packages that are now part of Buildroot. This causes Buildroot to generate message like this at initialization time:</p> <pre>package/xbmc/libcec/libcec.mk:30: warning: overriding commands for target `libcec-show-depends' package/libcec/libcec.mk:33: warning: ignoring old commands for target `libcec-show-depends' package/xbmc/libcec/libcec.mk:30: warning: overriding commands for target `libcec-clean-for-rebuild' package/libcec/libcec.mk:33: warning: ignoring old commands for target `libcec-clean-for-rebuild'</pre> <p>The XBMC package should be updated to utilize Buildroot's versions of these packages. The XBMC package should offer them as an option and then select them if the user wants to use them in XBMC.</p>			

History

#1 - 27 Jul 2016 16:22 - Hammel

- Status changed from New to Closed

- % Done changed from 0 to 100

xbmc was dropped from the core system and is not used in the media platform builds.

closing issue.
