

PiBox - Bug #287

Disable NFS

08 Mar 2014 16:40 - Hammel

Status:	Closed	Start date:	08 Mar 2014
Priority:	Immediate	Due date:	
Assignee:	Hammel	% Done:	100%
Category:	04 - Root File System	Estimated time:	0.00 hour
Target version:	0.8.0		
Severity:	03 - Medium		
Description			
We won't be using NFS for file sharing. Samba turns out to be a lot simpler to configure and use for things like streaming videos.			

Associated revisions

Revision 048c0342 - 09 Mar 2014 12:31 - Hammel

RM #286: Disabled surf, midori and webkit.

RM #287: Disabled portmap.

Revision c8416928 - 11 Mar 2014 18:33 - Hammel

RM #291: Changed local kernel config name so it doesn't include git id.

RM #287: Disabled NFS in the kernel and rootfs.

RM #231: Disabled all unused filesystems.

History

#1 - 11 Mar 2014 18:50 - Hammel

- Status changed from New to In Progress

- % Done changed from 0 to 30

Checked in kernel and rootfs updates to disable NFS. Need a clean rebuild to verify that no nfs artifacts remain.

#2 - 12 Mar 2014 19:45 - Hammel

- % Done changed from 30 to 70

Clean rebuild shows no nfs artifacts remain. Rebuild needs to be booted on target to make sure no dependency artifacts remain.

#3 - 13 Mar 2014 18:51 - Hammel

- Status changed from In Progress to Closed

- % Done changed from 70 to 100

Verified 0.8 build does not contain any NFS components and the lack of them doesn't appear to affect anything.

Closing issue.
