| <p>In the trailer (or outside on the drive in setup) the mouse can be hard to see. The way to fix this is with a cursor theme. I want a non-standard pointer (like a circle instead of an arrow) that is much larger.</p> <ul style="list-style-type: none"><li>- <a href="http://www.x.org/archive/X11R7.5/doc/man/man3/Xcursor.3.html#sect5">http://www.x.org/archive/X11R7.5/doc/man/man3/Xcursor.3.html#sect5</a></li><li>- <a href="http://kde-look.org/content/show.php?content=28310">http://kde-look.org/content/show.php?content=28310</a></li><li>- <a href="http://customize.org/xcursors">http://customize.org/xcursors</a></li><li>- <a href="http://kde-look.org/index.php?xcontentmode=36">http://kde-look.org/index.php?xcontentmode=36</a> or <a href="http://gnome-look.org/?xcontentmode=36">http://gnome-look.org/?xcontentmode=36</a> (probably the same as kde)</li><li>- <a href="http://gnome-look.org/content/show.php?content=165310">http://gnome-look.org/content/show.php?content=165310</a> (how to install cursor themes)</li><li>- <a href="https://wiki.archlinux.org/index.php/Cursor_Themes">https://wiki.archlinux.org/index.php/Cursor_Themes</a> - includes how to install cursors without a desktop environment</li></ul> |             |                        |             |

#### Associated revisions

Revision 01d9bb21 - 02 Aug 2014 16:56 - Hammel

RM #358: Add larger mouse icon set to packaging.

#### History

#1 - 29 Jul 2014 16:43 - Hammel

- *Description updated*

#2 - 29 Jul 2014 17:00 - Hammel

- *Status changed from New to In Progress*

- *% Done changed from 0 to 10*

Downloaded a number of possible themes. There are in galileo:src/graphics/icons/cursors. I need to try them on a test system to see if any look good.

#3 - 29 Jul 2014 23:16 - Hammel

- *% Done changed from 10 to 70*

I installed a 64x64 theme called RingGreen64 and it seems pretty nice. The main pointer is an animated circle with a pointer in the NorthWest quadrant. And the center is transparent but flashes gray every now and then which helps find the pointer on the screen.

I've added this to the PiBox Media Server UI package. I still need to verify the package installs correctly.

#4 - 30 Jul 2014 21:31 - Hammel

- *Status changed from In Progress to Closed*
- *% Done changed from 70 to 100*

Verified that it works in a clean install. The mouse pointer is much easier to see now.

Closing issue.
