

## piboxwww - Bug #399

### Missing IP address in web interface

20 Nov 2014 17:10 - Hammel

<b>Status:</b>	Closed	<b>Start date:</b>	20 Nov 2014
<b>Priority:</b>	Immediate	<b>Due date:</b>	
<b>Assignee:</b>	Hammel	<b>% Done:</b>	100%
<b>Category:</b>	Settings	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.10.0		
<b>Severity:</b>	02 - High		
<b>Description</b>			
<p>The IPV4 settings page should include the current IP address of the selected interface. This would be an additional protocol action similar to the just added MA_GETMAC, which means:</p> <ul style="list-style-type: none"><li>- Update piboxd/src/net.c, etc. - see getMAC()</li><li>- Update piboxwww/src/piboxwww/php/settings.{tmpl,php} - see getMAC()</li></ul> <p>For a simple IOCTL based method of getting the IP address, see <a href="#">this article</a></p>			

#### Associated revisions

##### Revision 50eb209a - 02 Dec 2014 11:16 - Hammel

RM #399: Updated message format diagram to include MA\_GETMAC and MA\_GETIP.

##### Revision 9d2f6ff0 - 02 Dec 2014 11:18 - Hammel

RM #399: Added support for MA\_GETIP message action.

##### Revision bafc029f - 02 Dec 2014 11:18 - Hammel

RM #399: Added IP address below MAC address and integrated new MA\_GETIP messaging with piboxd.

#### History

##### #1 - 02 Dec 2014 11:20 - Hammel

- Status changed from New to Closed
- % Done changed from 0 to 100

Added support in piboxd for new MA\_GETIP message action and added support to piboxwww to use it to display the current interface IP address.

All changes tested on target and pushed upstream.

Closing issue.
