<b>Description</b>			
This will allow VideoFE to be used at home.			

#### Associated revisions

##### Revision 1a81418a - 18 Sep 2015 19:53 - Hammel

RM #443: Add support for scans using user-defined extensions that are saved in session data.

##### Revision 1a81418a - 18 Sep 2015 19:53 - Hammel

RM #443: Add support for scans using user-defined extensions that are saved in session data.

#### History

##### #1 - 19 Jun 2015 16:49 - Hammel

If I do this, then the player will have to support suffix-based player commands. This is because xine will play an mp4 like this:

```
| xine file://path/file.mp4
```

but it plays a ripped DVD ISO like this:

```
| xine dvd://path/file.iso
```

There is no one-command-fits-all option here. That opens up a can of worms related to file identification in the player. See RM #450.

##### #2 - 13 Sep 2015 21:06 - Hammel

- Subject changed from *Include scans of ISO* to *Include scans of ISO and other video formats, based on user config*.

##### #3 - 15 Sep 2015 14:07 - Hammel

- Priority changed from *Urgent* to *Immediate*

- Severity changed from *03 - Medium* to *02 - High*

##### #4 - 15 Sep 2015 22:06 - Hammel

- Status changed from *New* to *In Progress*

- % Done changed from *0* to *30*

Added field for filename extensions to the UI and the ability to save them as a properties value. Still need to integrate the values in this field into the scan.

**#5 - 16 Sep 2015 11:29 - Hammel**

- % Done changed from 30 to 50

The code to make use of the user-configurable filename extensions is now in place. It just needs to be tested.

**#6 - 02 Oct 2015 21:23 - Hammel**

- Status changed from *In Progress* to *Closed*

- % Done changed from 50 to 100

Tested as working. I was able to specify different formats to scan and it worked fine.

Closing issue.
