Target version:	
Severity: 03 - Medium	

Description

I need the following to compile:

1. Jarvis
2. imlightsw (arduino)

I need the following utilities on the laptop:

1. screen
2. minicom (with USB connections for programmer and imlightsw boards)

Other code doesn't need to compile so I could just rsync RPi from galileo and then apps should compile.

History

#1 - 30 Sep 2018 19:31 - Hammel

- Status changed from New to Closed

- % Done changed from 0 to 100

This is done. I can build on and push from the Chromebook so updates at the Faire should be possible, even with the AP enabled.

Closing issue.
