

pibox-network-config - Bug #740

Move device list / channel usage horizontally

17 Feb 2020 11:51 - Hammel

Status:	Closed	Start date:	17 Feb 2020
Priority:	Immediate	Due date:	
Assignee:	Hammel	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.1.0 - Upgrades		
Severity:	02 - High		
Description			
Both of the list fields are vertical, making the scanner very small on horizontal displays (like the 7" touchscreen).			
The fix is to draw those fields in a limited space on the left of the graph and the graph to the right of those fields.

I changed my mind. It looks fine if I

1. change the colors used for data
2. change the font sizes to be slightly smaller

So i did that. This still may not work very well if there are routers using unusual channels, making the list of channels in use large. But for now this seems okay.

Tested, committed, pushed.

Closing issue.
