

libpibox - Bug #784

Unit tests do not run successfully

27 Jul 2020 19:39 - Hammel

| | | | |
|--|-----------------|------------------------|-------------|
| Status: | Rejected | Start date: | 27 Jul 2020 |
| Priority: | Immediate | Due date: | |
| Assignee: | Hammel | % Done: | 100% |
| Category: | | Estimated time: | 0.00 hour |
| Target version: | 2.0 - Harkonnen | | |
| Severity: | 03 - Medium | | |
| Description | | | |
| Adding unit tests for RM #751 I found that if you run all tests the run will fail on INFO: [FW] ===== Test Title: rpilnit [FW] rpilnit (NULL file): PASS [FW] rpilnit (bad file): PASS ERROR: [FW] rpilnit (good file): FAIL Failed to open or read config.txt | | | |

History

#1 - 28 Jul 2020 17:45 - Hammel

- Status changed from New to Rejected
- % Done changed from 0 to 100

Rejecting: user error. I wasn't running the unit tests correctly. The actually work just fine.

I've added a README.md to remind me of how to run them. This is going in with RM #751.

Closing issue.
